THINKCENTRE M57e:

HIGHLY MANAGEABLE, FULLY LOADED AND ABSOLUTELY BUDGET-FRIENDLY.

The ThinkCentre M57e is the latest edition to the enterprise-friendly M series of Lenovo desktop PCs. The ThinkCentre M57e is packed with the latest innovations including new Intel® 45nm processors and Intel® Core™2 Quad processors, DirectX10 graphic cards, Dual Independent Display and the ability to lock USB ports. All M57e form factors (tower, desktop and small form factor) offer Energy Star 4.0 compliant models. They can reduce energy costs considerably for an enterprise operating a large number of PCs.

The tools in the ThinkVantage® Technologies suite, such as Rescue & Recovery™ or System Migration Assistant™ greatly increase PC management efficiency. The M57e offers exceptional acoustic and thermal improvements over its predecessors, offering a cooler and quieter PC experience. With a variety of form factors, platform stability, rock-solid quality and security, and a common software image, the M Series is engineered to satisfy the demands of IT Managers.

M57e is secure thanks to its Chassis Intrusion Switch, optional ThinkPlus Fingerprint Reader keyboard, and ability to disable USB ports. Lenovo continuously works with Computrace to provide support for their asset management & recovery solutions, ensuring you have seamless integration with minimal hassle.

Built to perform, the latest M57e models feature Intel® Core™2 Duo and Core™2 Quad processors backed by the G31 chipset and high speed DDR2 memory. Dual monitor support is available with the ADD2 add-in card or ATI Radeon™ HD discrete graphics solutions.

Lower energy consumption means less heat is produced and less noise is generated keeping the system cool. The M57e is Energy Star 4.0 certified (on select models) with a new cooling design that lowers temperatures and improves acoustics.

Lenovo recommends Windows Vista® Business.
